

ARCHITECTURAL MILLWORK PROFILES

EAGLE ARCHITECTURAL ALUMINUM TRIMS

UPGRADE YOUR MILLWORK WITH EAGLE ARCHITECTURAL TRIMS

Architectural millwork can be found in every type of project from office buildings to your favorite restaurant, retail store, or furniture applications. If you look closely, you will see how Eagle Aluminum Architectural Trims and reveals add protection to high-end decorative millwork, wall panels, glass, or cabinetry design.

Aluminum millwork trims can be a builder's best friend to protect and extend the life cycle of their high-end wood designs. Our trims and reveals are made from high-quality aluminum that is resistant to corrosion, fading, and scratching. They're easy to install and maintain, and they will give your space a finished, professional look that will last for years to come.

Millwork Channels and Reveals provide straight, even lines between architectural interior panels, creating a sense of depth and enhancing the aesthetic of any design. Architectural aluminum reveal trims can be installed horizontally, vertically, or at any angle, to produce an endless assortment of patterns that add visual interest to your project. Optional styles include both open edges and flanged return keys to protect panels and conceal unfinished edges.

Eagle Aluminum's Millwork Channels and Reveals are made from 6063-T5 aluminum, a preferred material for aluminum trim extrusions due to its smooth surface and acceptance of anodized finishing. When panels are installed with Z clip ZCP-375 (.25" stand-off), these aluminum channel reveals accommodate .50" or .75" panels.

Example Installation: EMT-02100 Channel Reveal with .75" Millwork Panel and ZCP-375 Eagle-Clip Z Clip Millwork Cleat.

Close-Up Edge Detail

Millwork Angles and Terminations are mainly used as cross-section or framing components for doors, entranceways, and ceilings as well as corner protection along walls, desks, and store fixtures. Optional styles include both open edges and flanged return keys to protect panels and conceal unfinished edges.

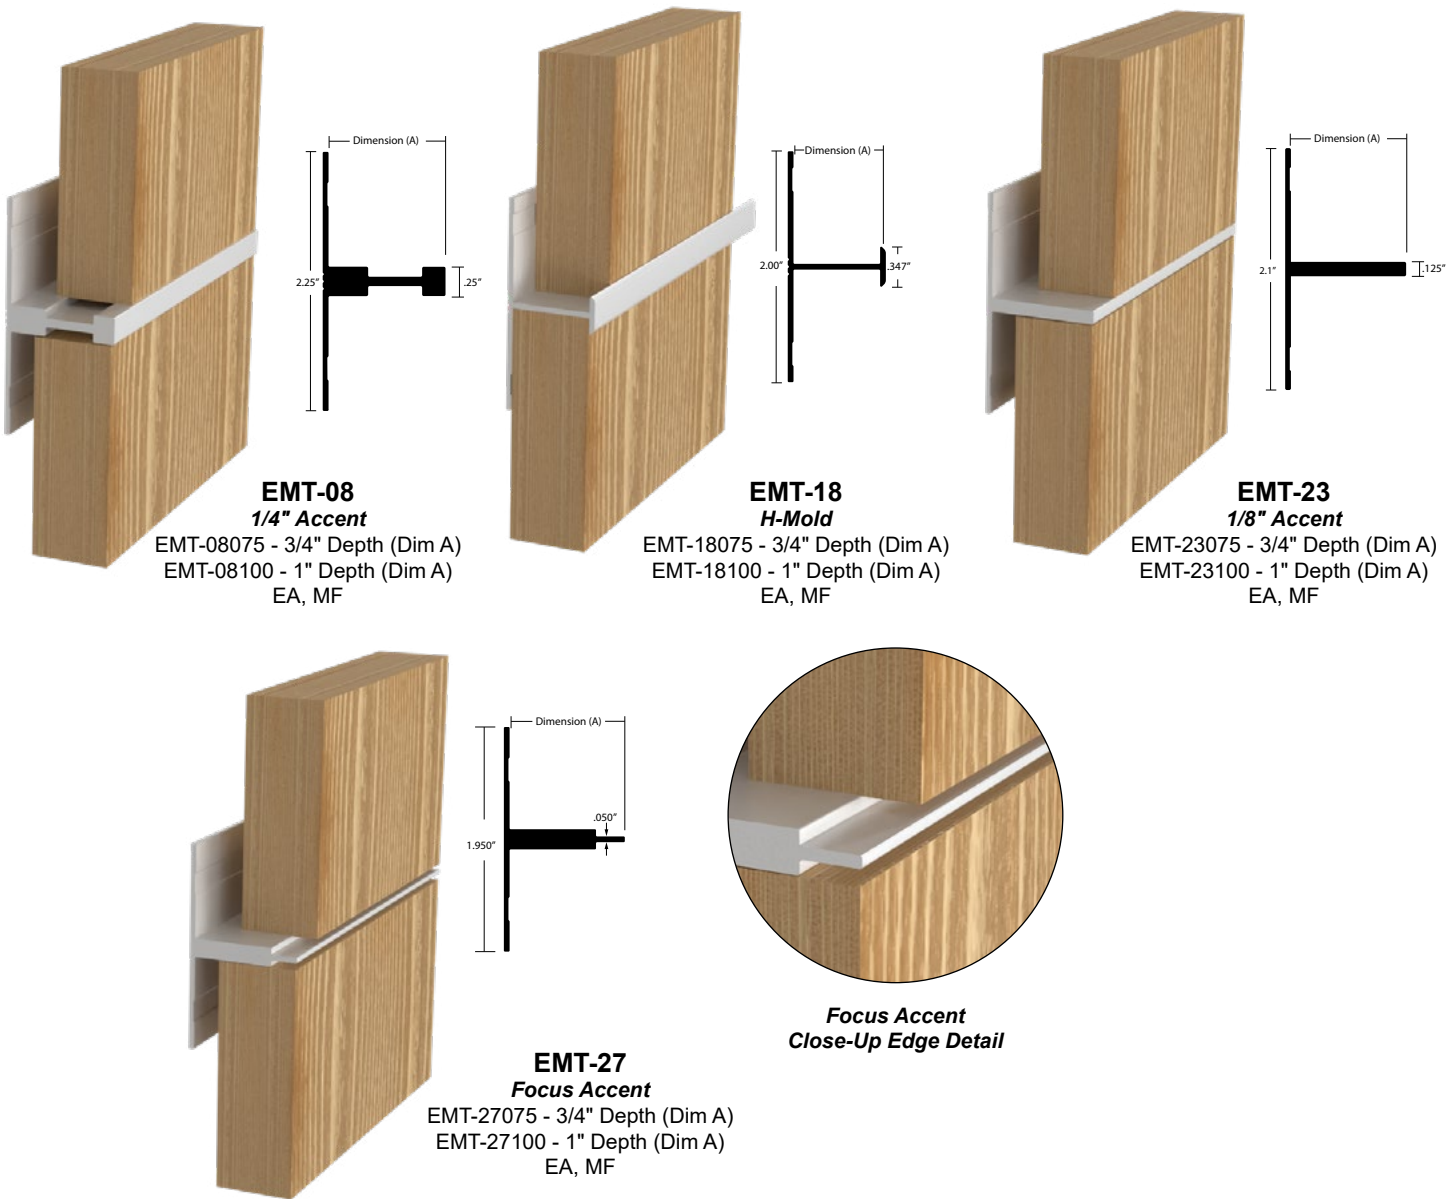

Eagle Aluminum's Millwork Angles and Terminations are made from 6063-T5 aluminum, a preferred material for aluminum trim extrusions due to its smooth surface and acceptance of anodized finishing. When panels are installed with Z clip ZCP-375 (.25" stand-off), these aluminum angles and terminations accommodate .50" or .75" panels.

Example Installation: EMT-09100 Termination Accent with .75" Millwork Panel and ZCP-375 Eagle-Clip Z Clip Millwork Cleat.

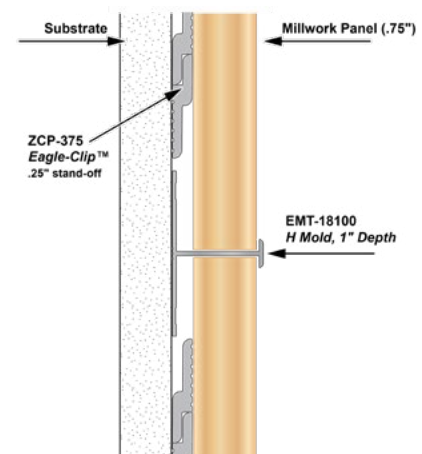

Eagle Aluminum offers custom finishing, fabrication, and cutting services for all stocked and special order extrusions.

MILLWORK PROFILES - ACCENTS & DIVIDERS

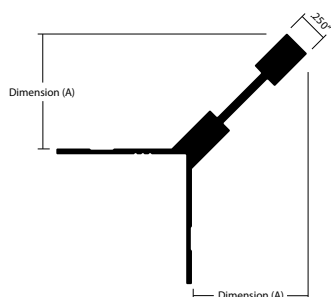

Millwork Accents and Dividers are commonly used for framing, signage, and dividing wall panels. Aluminum accents and dividers can easily elevate the look of any space. The strength and affordability of aluminum dividers make them an excellent addition to any project where panel seams need a protected and polished solution. Optional styles include both open edges and flanged return keys to protect panels and conceal unfinished edges.

Eagle Aluminum's Accents and Dividers are made from 6063-T5 aluminum, a preferred material for aluminum trim extrusions due to its smooth surface and acceptance of anodized finishing. When panels are installed with Z clip ZCP-375 (.25" stand-off), these aluminum accents and dividers accommodate .50" or .75" panels.

Example Installation: EMT-18100 H Mold Divider with .75" Millwork Panel and ZCP-375 Eagle-Clip Z Clip Millwork Cleat.

Specifically designed for inside corners, these **Millwork Inside Corner Trims** fit snugly into the corner, providing a smooth and finished appearance. They come in various sizes and profiles, so you can easily find the perfect fit for any inside corner. Not only do these trims offer a clean and refined aesthetic, but they also protect the corners from damage and wear and tear. Optional styles include both open edges and flanged return keys to protect panels and conceal unfinished edges.

Eagle Aluminum's Inside Corners are made from 6063-T5 aluminum, a preferred material for aluminum trim extrusions due to its smooth surface and acceptance of anodized finishing. When panels are installed with Z clip ZCP-375 (.25" stand-off), aluminum these inside corner trims accommodate .50" or .75" panels.

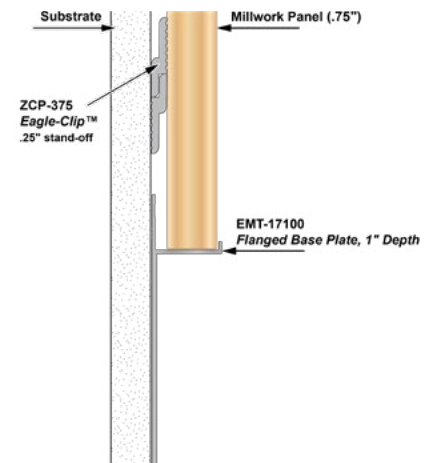

Example Installation: EMT-12100 Flanged Inside Corner with .75" Millwork Panel and ZCP-375 Eagle-Clip Z Clip Millwork Cleat.

MILLWORK PROFILES - BASE PLATES

Millwork Base Plates are used as both decorative elements and to conceal unevenness or gaps where walls and floors meet. When used in contrast with wall material, they create an impactful design element; when used in blended colors, they create minimalist shadow lines. Optional styles include both open edges and flanged return keys to protect panels and conceal unfinished edges.

Eagle Aluminum's Base Plates are made from 6063-T5 aluminum, a preferred material for aluminum trim extrusions due to its smooth surface and acceptance of anodized finishing. When panels are installed with Z clip ZCP-375 (.25" stand-off), aluminum base plates accommodate .50" or .75" panels.

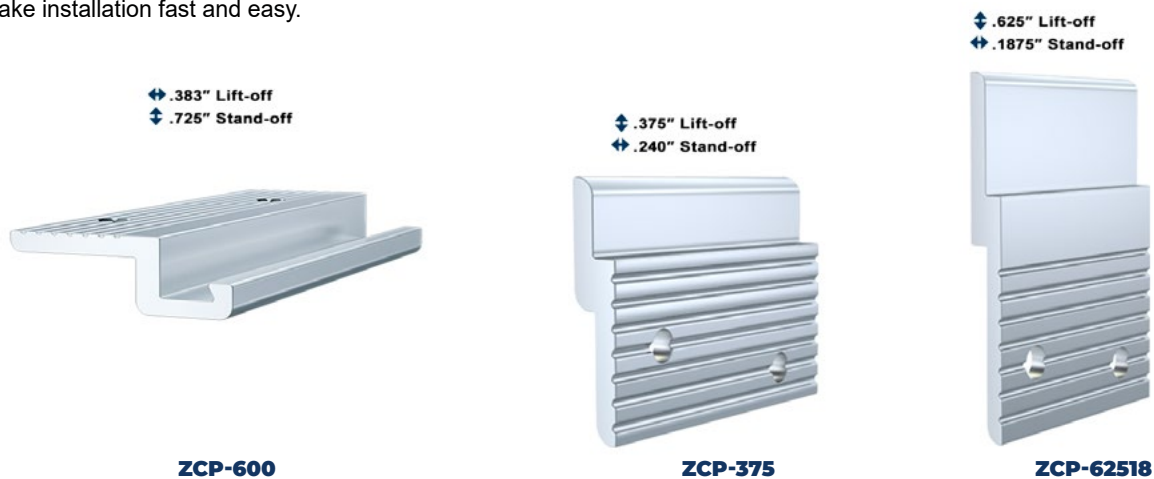

Example Installation: EMT-17100 Flanged Base Plate with .75" Millwork Panel and ZCP-375 Eagle-Clip Z Clip Millwork Cleat.

EAGLE-CLIP™ ALUMINUM Z CLIP HANGING SYSTEM

Hanging things has never been easier. The **Eagle-Clip Z Clips** (aluminum z extrusions) are a fast and cost effective method to hang, fasten, and secure any kind of wall panel, acoustical panel, partition, frame, cabinet, sign, mirror or piece of artwork. Our specially engineered Eagle-Clip Z Clips allow for fast mounting and removal. Made from heat treated hardened aluminum, wall panel clips are available in 1.5" and 2" clips, while ceiling clips are 2.5". With continuous lengths of 72" and 144", either drilled or undrilled, the Eagle-Clip Z Clips make installation fast and easy.
