

## THE EAGLE CEILING CLIP

.383" Lift-off  
 .725" Stand-off

## THE ULTIMATE SOLUTION FOR SECURE WOOD PANEL CEILING INSTALLATION

Are you an architect, designer, or builder seeking a reliable solution for installing architectural panels on ceilings? Look no further! The Eagle Ceiling Clips have been meticulously designed to address the challenges of wood panel installation while maintaining aesthetics, strength, and ease of use.

Upgrade your wood panel installations with the Eagle Ceiling Clips. Experience the perfect blend of form and function – where creativity meets reliability.

### APPLICATIONS:

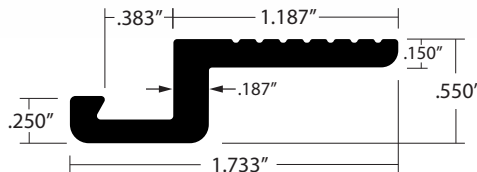

#### Ceilings

- Securely affix your ceiling panels using the Eagle Ceiling Clip's interlocking design. These clips feature user-friendly connections that streamline the installation process: simply install the clips, elevate the panel, glide it into place, and secure the panel. This method ensures a sophisticated and seamless appearance for your ceiling panel setup, enhancing both safety and aesthetics.

### SPECIFICATIONS:

- 2.50" Eagle Ceiling Clip - ZCP-600-2.5
- 6' (72") continuous length z-bar - ZCP-600-72
- 12' (144") continuous length z-bar - ZCP-600-144
- Continuous lengths are available unpunched or pre-punched holes every 8" on center
- Aluminum Alloy 6005-T6 temper in accordance with ASTM B221
- Custom sizes and hole locations available
- Patent Pending

EAGLE CEILING CLIPS	ZCP-600-2.5	ZCP-600-72	ZCP-600-144
Clip Width:	2.50"	-	-

Lift-Off:	.383"	.383"	.383"
Projection/Stand-Off:	.725"	.725"	.725"
Clip Height:	1.733"	1.733"	1.733"
Clip Hole Size:	.210"	.210"	.210"
Aluminum Material:	6005-T6	6005-T6	6005-T6

### KEY FEATURES:

#### Interlocking Mating Surface

- The heart of the Eagle Ceiling Clip lies in its patent-pending design. The interlocking mating surface ensures a secure hold, preventing any unwanted movement.
- The interlocking design is engineered to prevent any lateral movement of the panels, keeping them safe and secure during and after installation.

#### Aluminum Profile

- Crafted from high-quality aluminum, the Ceiling Clip strikes the perfect balance between strength and weight.
- Aluminum is not only lightweight but also corrosion-resistant, making it ideal for both indoor and outdoor applications.

#### Concealed Fastener

- The Eagle Ceiling Clip is a concealed fastener system, similar to its sibling, the Eagle Z Clip.
- No unsightly screws or nails disrupting the clean lines of your wood panels. The Eagle Ceiling Clip ensures a sleek, professional appearance.

#### Secure Load Strength

- The Eagle Ceiling Clip is engineered to handle substantial loads. Whether you're installing lightweight decorative panels or heavy-duty wood panels, rest assured that they'll remain secure.
- Architects and designers can confidently create stunning visual displays without compromising safety.
- The Eagle Ceiling Clip has been tested by an independent testing laboratory using SPF boards with #8 wood screws.
- Lengths ranging from 2.5" clips up to 48" rails were tested until failure in the vertical applications (as a ceiling panel would be).
- In all cases, the failure load was >800 lb and was due to the hardware or substrate failing.
- There were no instances of aluminum failure in any of the testing.
